-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of Group IV claims 27-44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64 and 66 in the reply filed on 02/09/09 is acknowledged. Upon Applicants request for clarification of the non-responsive communication issued 04/07/2009 due to lack of species election as previously required in the first restriction requirement the following actions are taken:
2. The previous notice of non-compliant reply is hereby withdrawn;
3. Upon further consideration a restriction requirement and election of species is require as indicated below.
4. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 27-33, 42-44, 46, 48, 50, 52 and 54, drawn to a method of making a doped metal oxide.

Group II, claim(s) 27, 34-43, 56, 58, 60, 62, 64 and 66 , drawn to a method of making a doped metal oxide alloy.

5. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of group I does not require the special technical feature of providing additional material to form the alloy as required by group II.

Art Unit: 2812

6. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- a. Specie I, method of making a p-type metal oxide
- b. Specie II, method of making a n-type metal oxide
- c. Specie III, method of making a p-type metal oxide alloy
- d. Specie IV, method of making a n-type metal oxide alloy

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Specie I: claims 30, 31, 48 and 50  
Specie II: claims 32, 33, 52 and 54  
Specie III: claims 38, 39, 60 and 62  
Specie IV: claims 40, 41, 64 and 66

Art Unit: 2812

The following claim(s) are generic: claims 27-29, 42-44 and 46 appear to be generic to group I, and claims 27, 34-37, 42, 43, 56 and 58 appear to be generic to group II.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Species I and III require a p-type dopant while species II and IV require an n-type dopant.

6. A telephone call was made to David Jacobs on 04/14/09 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
